

OFFICE OF THE OMBUDSMAN

Document Barcode and QR Code System

User Manual — Complete Edition

Secure. Organized. Accessible.

For all users and system administrators

Signing in, adding and finding documents, printing and scanning tracking-code labels, and administering users, folders, document types, settings, reports and the audit trail.

About this manual

This manual explains how to use the Office of the Ombudsman Document Barcode and QR Code System. It covers every screen: signing in, recording documents, printing tracking-code labels, finding documents by scanning, and running the system as an administrator.

How the manual is organised

Part	What it covers	Who should read it
Part I — Getting Started	What the system does, roles and access, signing in, and the layout of the screen.	Everyone
Part II — Working with Documents	Adding, viewing, printing, editing, deleting, scanning and finding documents; notifications and your profile.	Everyone
Part III — Administration	Dashboard, users and roles, settings, document form, document types, folders, reports and the audit trail.	Administrators
Part IV — Reference	First-time setup checklist, troubleshooting, glossary and quick-reference tables.	Everyone

Conventions

Convention	Meaning
Add New Document	Text in this colour is a button, menu item, tab or field label exactly as it appears on screen.
INV-2026-0001	Text in this style is a value you type or a code the system produces.
Settings > Folders	A path through the menus: open Settings , then the Folders tab.
ADMIN ONLY	The chapter or feature is available only to users with the admin role.

Note. Administrators can rename, reorder, hide and add fields on the document form. If a field on your screen has a different name from the one in this manual, your administrator has customised it; it works the same way.

Tip. The screens adapt to phones and tablets. Where the layout differs on a small screen, the manual says so.

PART I

Getting Started

What the system is for, who can do what, and how to find your way around.

CHAPTER 1

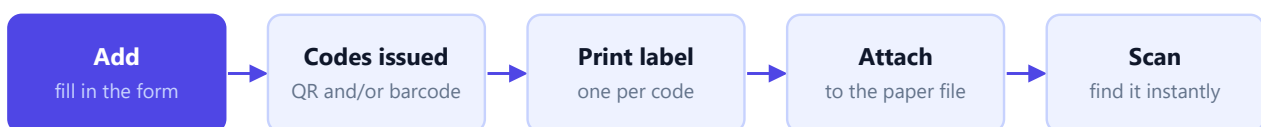

Introduction

The system gives every document a tracking code, a QR code, a barcode or both, so that a paper file can be identified and its record opened in seconds by scanning its label.

What the system does

- **Records documents.** Each document is entered once, with a label, a document type, a department and any other details your office captures.
- **Issues tracking codes.** On saving, the system generates a QR code, a barcode, or both. When a document has both, they share one number, so either one leads back to the same record.
- **Prints labels.** Each code prints as a label showing the code and the document's key details, ready to attach to the paper file.
- **Finds documents by scanning.** A handheld scanner, a typed code or a phone camera takes you straight to the document.
- **Controls access.** Folders decide which roles may see a document type and which may also add, edit and delete documents of that type.
- **Keeps an audit trail.** Sign-ins and changes to records are logged with the user, time and IP address.
- **Reports.** Administrators can view and print document inventories and user activity for any period.

How a document moves through the system

Every document follows the same path from entry to retrieval.

Key terms

Term	Meaning
Document	A record in the system describing one physical or electronic document. It holds a label, a document type, a department, optional extra details, and one or two tracking codes.
Tracking code	The QR code and/or barcode issued when a document is added. Its number follows the office's numbering format, e.g. <code>INV-2026-0001</code> . A tracking code cannot be changed after it is issued.
Code ID	The reference shown under each code image: <code>#QR-INV-2026-0001</code> for a QR code, <code>#BC-INV-2026-0001</code> for a barcode.
Document Type	A category of document, such as <i>Memorandum</i> or <i>Office Order</i> . Each type belongs to one folder.
Folder / Department	A group of document types, usually one per office unit. A document's Department is its type's folder. Folders are where access is granted to roles.

Term	Meaning
Role	A named group of users, such as admin or user . Administrators can create more roles.
Manage / Read Only	The two levels of access a folder can grant to a role. See Chapter 2.
Scan count	The number of times a document has been opened by scanning or through its QR page.

CHAPTER 2

Roles and Access

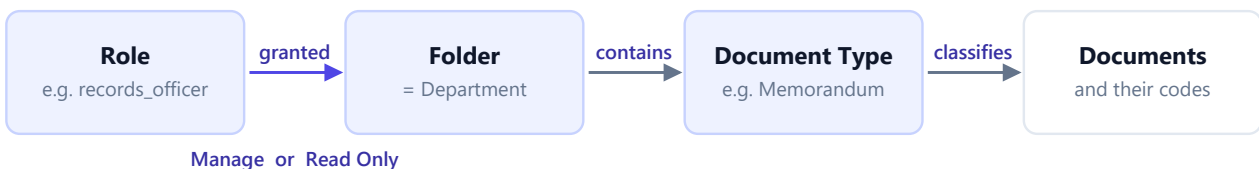

What you can see and do depends on your role and on the folders your role has been granted.

Built-in roles

Role	Description
admin	Full access to every page and every document, regardless of folders. Only administrators see the Dashboard, Audit Trail, Reports, Settings and User Management.
user	The standard role. New self-registered accounts receive it automatically. What a user can see is decided entirely by folder grants.
Custom roles	Roles an administrator creates, such as <code>records_officer</code> or <code>viewer</code> . They behave like user and receive access through folders.

How folder access works

Access for everyone except administrators follows one chain: a **role** is granted a **folder**; the folder contains **document types**; documents belong to a type. The grant is either **Manage** or **Read Only**.

A user sees a document when a folder grants their role access to the document's type, or when they added it themselves.

What you want to do	Admin	Manage grant	Read Only grant	No grant
See documents of the type in the Documents list	✓	✓	✓	—
Find them by scanning or searching	✓	✓	✓	—
Open details, print labels, download codes	✓	✓	✓	—
Add new documents of the type	✓	✓	—	—
Edit or delete documents of the type	✓	✓	—	—
Choose the type or department on the form	✓	✓	—	—

- **You always see the documents you added yourself**, even if your role's access to that folder is later removed.
- If your role has a Manage grant on no folder at all, the **Add New Document** button does not appear.
- A document type that is not in any folder is visible only to administrators.

Important. The **Assign to Specific Users** and **Assign to System Roles** fields on the document form record who a document is assigned to. They do **not** grant or restrict access; access always follows the folder rules above.

Menu items by role

Menu item	Admin	Other roles
Dashboard	✓	—
Documents	✓	✓
Audit Trail	✓	—
Reports	✓	—
Settings (includes Document Form, Document Types, Folders, Code Format)	✓	—
User Management	✓	—
User Profile	✓	✓
Notifications	✓	✓
Logout	✓	✓

CHAPTER 3

Signing In and Out

Signing in

- 1 Open the system's web address in your browser. You are taken to the **Sign In** page.
- 2 Enter your **Email Address** and **Password**.
- 3 Optionally tick **Remember me** to stay signed in on this computer. The box appears only if an administrator has enabled it.
- 4 Click **Sign In**.

The screenshot shows the Sign In page. On the left, there is a blue sidebar with the Office of the Ombudsman logo and the text "Office of the Ombudsman Document Barcode and QR Code System" and "Secure. Organized. Accessible." Below this is a copyright notice: "© 2026 Office of the Ombudsman. All rights reserved." On the right, the main content area is light gray. It features a "Welcome back" heading, followed by the instruction "Sign in to your account to continue." Below this are two input fields: "Email Address" with the placeholder "you@example.com" and "Password" with a masked password "*****". There is a checkbox labeled "Remember me" and a link "Forgot password?". A blue "Sign In" button is positioned below the password field. At the bottom, there is a link "Don't have an account? Create one".

Figure 1. The Sign In page. The Remember me box appears only when an administrator has enabled it.

Administrators start on the **Dashboard**. Everyone else starts on the **Documents** page.

Warning. Do not tick **Remember me** on a shared or public computer.

Creating your own account

If self-registration is open, click **Create one** under the Sign In button, enter your name, email address and a password (twice), and submit.

Important. A new account receives the **user** role and has no folder access yet, so the Documents list will be empty. Ask your administrator to give your account the correct role.

Forgotten password

- 1 On the Sign In page click **Forgot password?**.
- 2 Enter your email address and click **Send Reset Link**.
- 3 Open the email you receive and follow the link.
- 4 Enter a new password twice and save it. You can then sign in with the new password.

Note. Reset emails depend on the server's email configuration. If no email arrives, an administrator can set a new password for you from **User Management** (see Chapter 15).

Signing out

Click **Logout** at the bottom of the menu. Always sign out when you leave a shared computer.

Automatic sign-out when idle

For security, you are signed out after a period without activity. By default this is **30 minutes**. Shortly before that (by default **5 minutes** before), a **Still there?** window appears with a countdown.

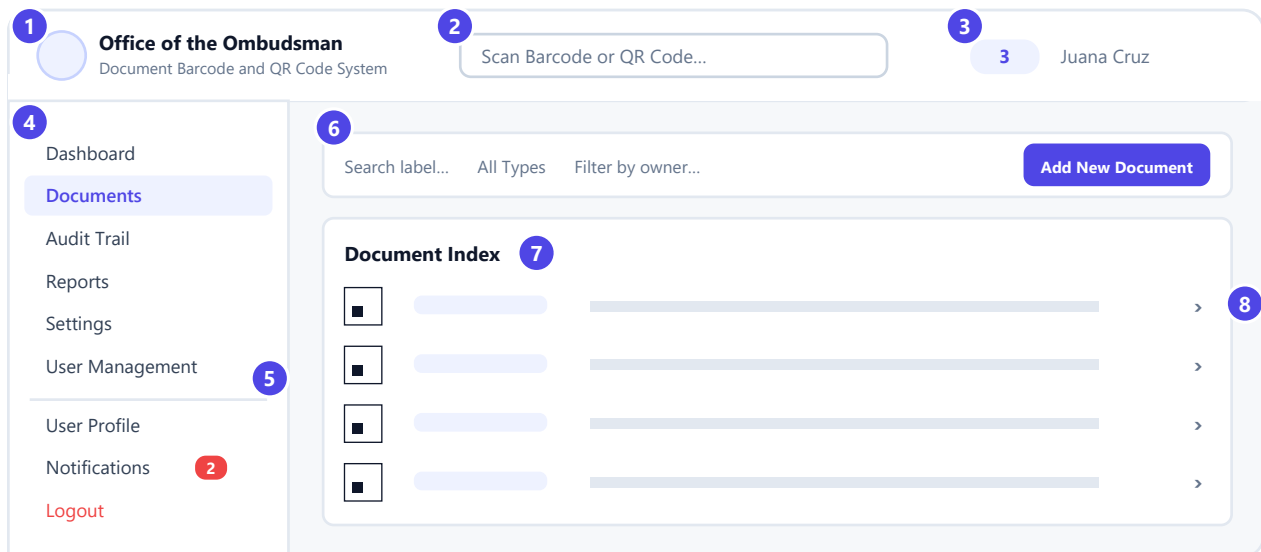

Button	Result
Stay signed in	Resets the timer and keeps you signed in.
Sign out	Signs you out immediately.
(no response)	When the countdown reaches zero you are signed out and returned to the Sign In page. Unsaved form entries are lost.

Tip. Activity in any tab of the system counts. Working in one tab keeps your other open tabs signed in.

CHAPTER 4

Finding Your Way Around

Every page shares the same top bar and menu.

#	Element	What it does
1	Logo and system name	Identifies the system. Click it to return to the Documents page.
2	Scan box	Click here, then scan a barcode or QR code, or type a code or document label. See Chapter 11.
3	Scan counter and your name	The indigo badge counts the documents you have opened by scanning in this browser. Your name confirms which account is signed in.
4	Main menu	The pages available to your role (see Chapter 2). The current page is highlighted.
5	Personal menu	User Profile , Notifications (a red badge shows unread notifications) and Logout .
6	Filter bar	Narrows the list and holds the Add New Document button.
7	Document Index	The list of documents you are allowed to see.
8	View button	The > arrow at the end of a row opens that document's details.

On tablets and phones

- **Tablet:** the menu shrinks to icons only. Hover over or tap an icon to use it.
- **Phone:** the menu is hidden. Tap the three-line button at the top left to open it, and tap outside it to close it. The scan box moves to its own bar under the top bar.
- On phones the Document Index shows only the codes, the document type and the view button.

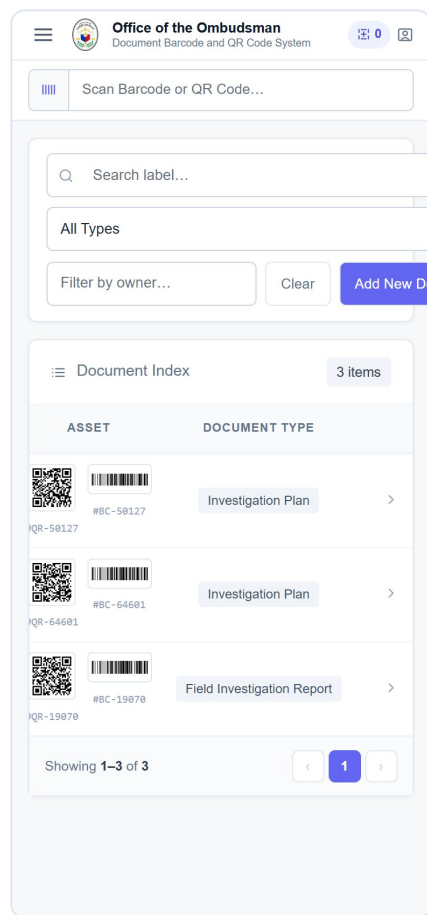

Figure 2. The Documents page on a phone. The menu opens from the three-line button at the top left.

Tip. Pop-up windows such as document details close with the **Close** or **×** button, by clicking outside them, or with the **Esc** key.

PART II

Working with Documents

Everyday tasks: recording documents, printing their labels and finding them again.

CHAPTER 5

The Documents Page

Documents in the main menu opens the list of every document you are allowed to see, newest first.

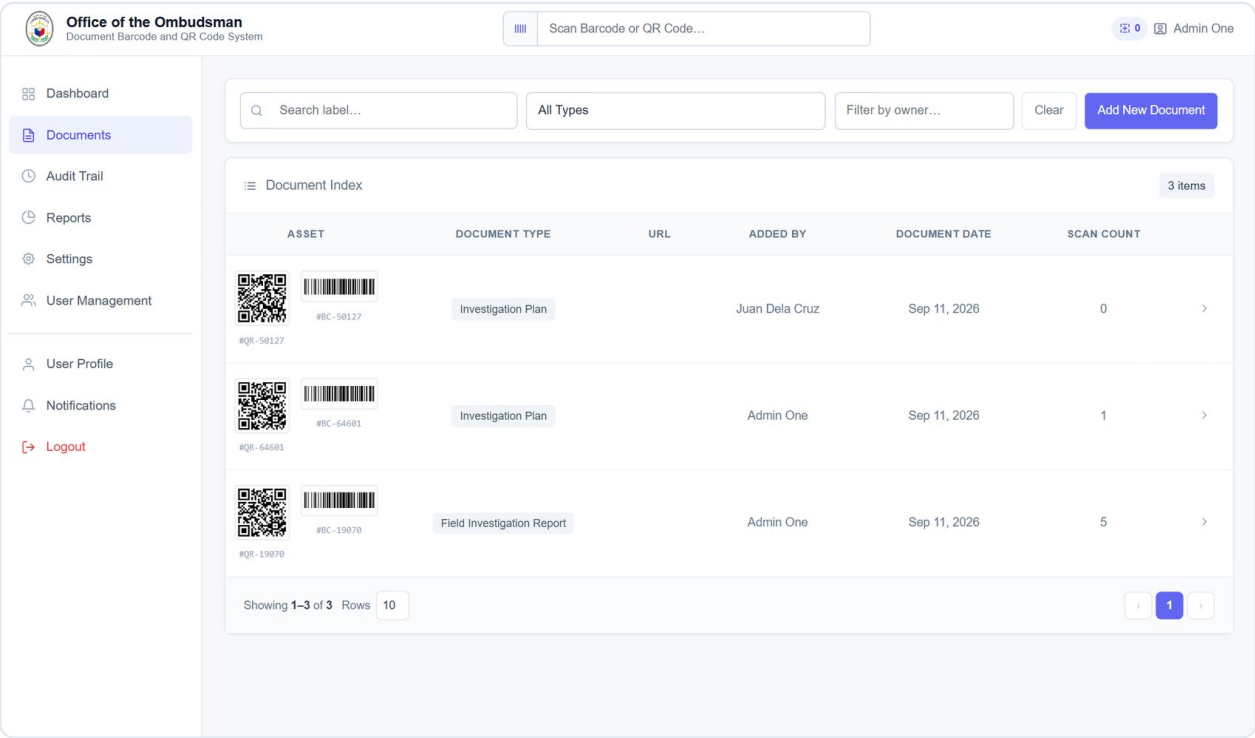

Figure 3. The Documents page as an administrator sees it.

Filtering the list

Control	How it filters
Search label...	Shows documents whose label contains the text you type.
All Types	Choose a document type to show only that type.
Filter by owner...	Shows documents added by users whose name contains the text you type.
Clear	Removes every filter, including any code in the scan box.
Add New Document	Opens the form for a new document (Chapter 6). Shown only if your role may add documents.

Filters apply as you type; there is no search button. Filters can be combined, and the scan box at the top also filters the list by code.

The Document Index

Column	Content
Asset	The document's QR code and/or barcode, each with its Code ID underneath.
Document Type	The document's type.
URL	The Link / Document URL recorded for the document, if any.
Added By	The user who added the document.
Document Date	The date the document was recorded in the system.
Scan Count	How many times the document has been opened by scanning.
>	Opens the document's details.

The heading shows how many documents match the current filters. Below the list, choose how many **Rows** to show per page (10, 25, 50 or 100) and move between pages with the page buttons or the < and > arrows.

Note. The document's **label** is shown in its details window and on its printed labels rather than as a column in the list.

The screenshot shows the 'Office of the Ombudsman' interface. The top bar includes the logo, name, and a search bar for 'Scan Barcode or QR Code...'. The user is logged in as 'Juan Dela Cruz 2'. The left sidebar has links for 'Documents', 'User Profile', 'Notifications', and 'Logout'. The main content area is titled 'Document Index' and shows a table with 3 items. The table has columns: ASSET, DOCUMENT TYPE, URL, ADDED BY, DOCUMENT DATE, and SCAN COUNT. The items are:

ASSET	DOCUMENT TYPE	URL	ADDED BY	DOCUMENT DATE	SCAN COUNT
 #QR-58127	Investigation Plan		Juan Dela Cruz	Sep 11, 2026	0
 #QR-64681	Investigation Plan		Admin One	Sep 11, 2026	1
 #QR-19878	Field Investigation Report		Admin One	Sep 11, 2026	6

At the bottom, it says 'Showing 1-3 of 3 Rows' and '10' rows per page. There are also page navigation buttons (1, 2, 3) and a 'Clear' button for filters.

Figure 4. The same page for a user whose role has only Read Only access. There is no Add New Document button.

CHAPTER 6

Adding a Document

Available if your role holds a Manage grant on at least one folder, and always for administrators.

Step by step

- 1 Go to **Documents** and click **Add New Document**.
- 2 Fill in the fields. Fields marked with a red asterisk (*) are required.
- 3 Under **Tracking Code**, tick **QR Code**, **Barcode**, or both. At least one must be ticked; QR Code is ticked by default.
- 4 Click **Save Document**.

Add New Document

Fill out metadata tags and attach your files.

New Document

Document Type*

Choose classification...

Remarks

Department

Choose department...

Tracking Code

☒ QR Code ☐ Barcode

Pick one or both. Both issues a QR code and a barcode that share a number, so either one scans back to this document.

Save Document

Figure 5. The Add New Document form. The fields above Tracking Code are set by your administrator.

The window closes, the new document appears at the top of the list with its code images, and you receive a notification confirming it was saved.

The standard fields

Field	What to enter
Label	The name of the document, e.g. <i>Memo 2026-114 — Travel Authority</i> . It prints at the top of every label. If your administrator has hidden this field, or you leave it blank, the document is named after its document type.

Field	What to enter
Document Type	The category of the document. The list shows only types your role may add documents to.
Department	The folder the document belongs to. Choosing a department narrows the Document Type list to that department's types; choosing a type fills in its department automatically.
Link / Document URL	Optional web address of the electronic copy, e.g. a shared-drive or records-portal link. People who scan the QR code are offered this link.
Assign to Specific Users	Optional. Tick the users the document is assigned to.
Assign to System Roles	Optional. Tick the roles the document is assigned to.
Additional fields	Any other fields your administrator has added, such as dates, reference numbers or yes/no flags. Hints under a field explain what it expects.

Choosing the tracking code

Choice	Best for
QR Code	Scanning with a phone camera or a 2-D scanner. The QR code contains a web address that opens the document's scan page (Chapter 11).
Barcode	Scanning with a standard handheld (1-D) barcode scanner. The barcode contains the tracking number only.
Both	Offices that use both kinds of scanner. The two codes share one number, e.g. <code>#QR-INV-2026-0001</code> and <code>#BC-INV-2026-0001</code> , and each prints on its own label.

Important. The tracking code is fixed once the document is saved. You cannot add, remove or change a code later, so choose carefully.

How tracking numbers are assigned

Numbers are issued automatically in the format set by your administrator. With the default format `INV-{YYYY}-{NNNN}`, documents added in 2026 are numbered `INV-2026-0001`, `INV-2026-0002` and so on. No two documents ever receive the same number.

If the form will not save

Message	What it means
Pick at least one tracking code.	Tick QR Code, Barcode or both.
This document type belongs to a different department.	The type and department do not match. Choose the type first; the department fills in automatically.
Your role does not have access to add documents to this class / department.	Your role only has Read Only access there. Ask an administrator for Manage access.
The ... field is required.	Fill in the field shown in red.

CHAPTER 7

Viewing Document Details

Click the › arrow at the end of a row to open **Document Details**. The window has two tabs, **Details** and **Print Preview**.

Details tab

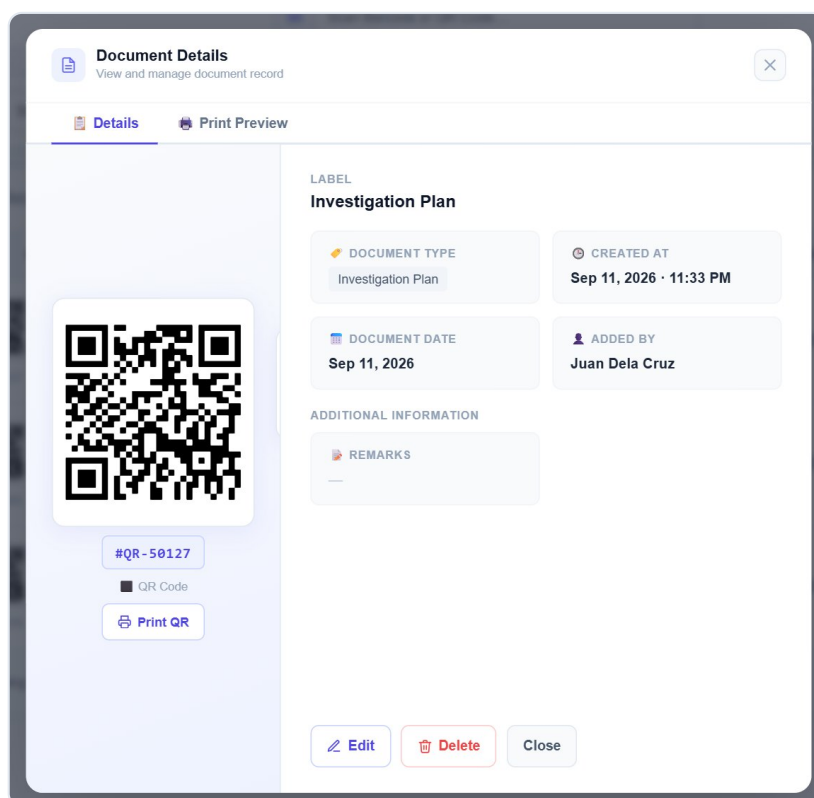

Figure 6. The Details tab. Each code has its own Print button.

Area	Content
Code panel	A large image of each code with its Code ID and type, and a Print QR / Print Barcode button under each. A document with two codes also shows Preview both labels .
Label	The document's label.
Summary cards	Document Type, Created At (date and time recorded), Document Date and Added By.
Additional Information	Every other field on the form, such as the department, URL, assigned users and roles, and any custom fields. URL fields are clickable; yes/no fields show Yes or No.
Buttons	Download File (when a file is attached), Edit and Delete (only if you may manage the document), and Close .

CHAPTER 8

Printing Labels

Each code prints as its own label, ready to attach to the paper file.

What a label shows

- The document's **label** as a heading.
- The **QR code** or **barcode** image.
- The **Code ID**, e.g. `#QR-INV-2026-0001`.
- The details: Document Type, Department, Document Date, every additional field that has a value, and Added By last. Empty fields are left off.

Printing one code

- 1 Open the document's details.
- 2 Under the code, click **Print QR** or **Print Barcode**.
- 3 A print window opens and your browser's print dialog appears. Choose the printer and click **Print**. The window closes by itself afterwards.

Printing both codes

- 1 Open the document's details and choose the **Print Preview** tab (or click **Preview both labels**).
- 2 Check the preview. Each code is shown as it will print.
- 3 Click **Print Both Labels**. Each label prints on its own page.

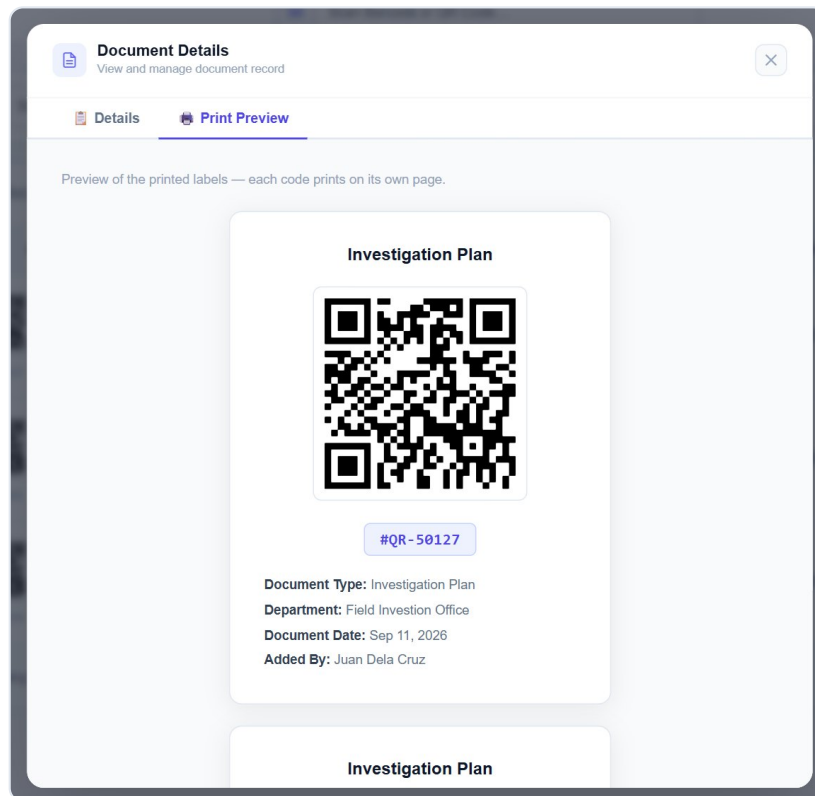

Figure 7. The Print Preview tab shows each label exactly as it will print.

Tip. Print at 100% scale (turn off *Fit to page* if the labels come out too small) and use a clean, high-contrast printer so scanners read the codes reliably.

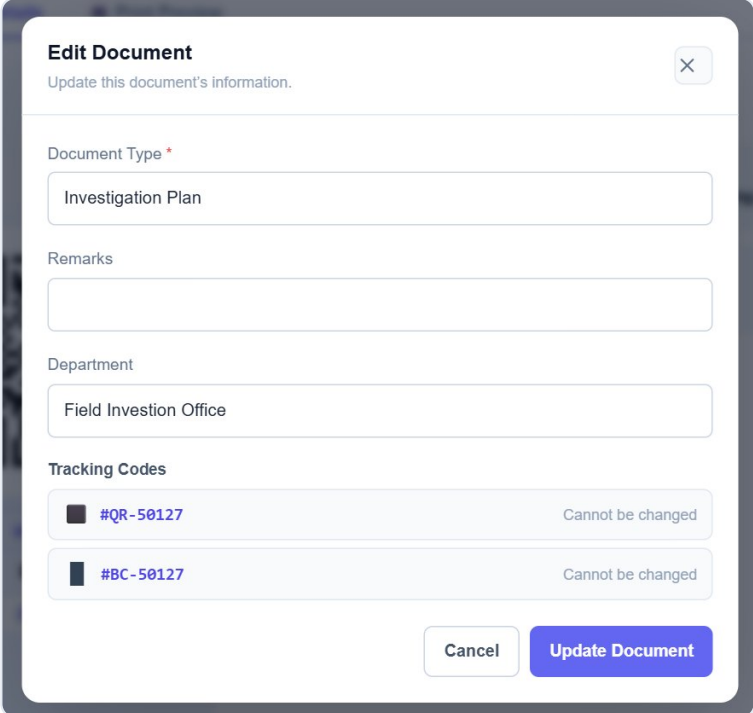

Note. If nothing happens when you click Print, your browser may be blocking pop-up windows. Allow pop-ups for the system's address and try again.

CHAPTER 9

Editing a Document

Available when your role may manage the document's type.

- 1 Open the document's details and click **Edit**.
- 2 Change the fields you need. The form has the same fields as when the document was added.
- 3 Click **Update Document**, or **Cancel** to discard your changes.

Edit Document
Update this document's information.

Document Type *
Investigation Plan

Remarks

Department
Field Investion Office

Tracking Codes

	#QR-50127	Cannot be changed
	#BC-50127	Cannot be changed

Cancel Update Document

Figure 8. The Edit Document form. Tracking codes are listed but cannot be changed.

- The **Tracking Code** is shown for reference and marked *Cannot be changed*. Printed labels therefore stay valid after an edit.
- To move a document to another type or department, you need Manage access to the new one as well.
- Edits are recorded in the audit trail with the values before and after the change.

CHAPTER 10

Deleting a Document

Available when your role may manage the document's type.

- 1 Open the document's details and click **Delete**.
- 2 A **Confirm Deletion** panel appears. Click **Yes, Delete** to proceed, or **Cancel**.

Warning. Deletion is permanent and cannot be undone. The document, its tracking codes and their images are removed. Printed labels for the document will no longer find anything when scanned.

CHAPTER 11

Scanning and Finding Documents

There are three ways to reach a document from its label: a handheld scanner, typing, or a phone camera.

With a handheld scanner

- 1 Click in the **Scan Barcode or QR Code...** box at the top of any page.
- 2 Scan the label. The scanner enters the code for you.
- 3 If the scanner sends **Enter** after the code (most do), the first matching document opens at once. Otherwise pick the document from the list that drops down under the box.

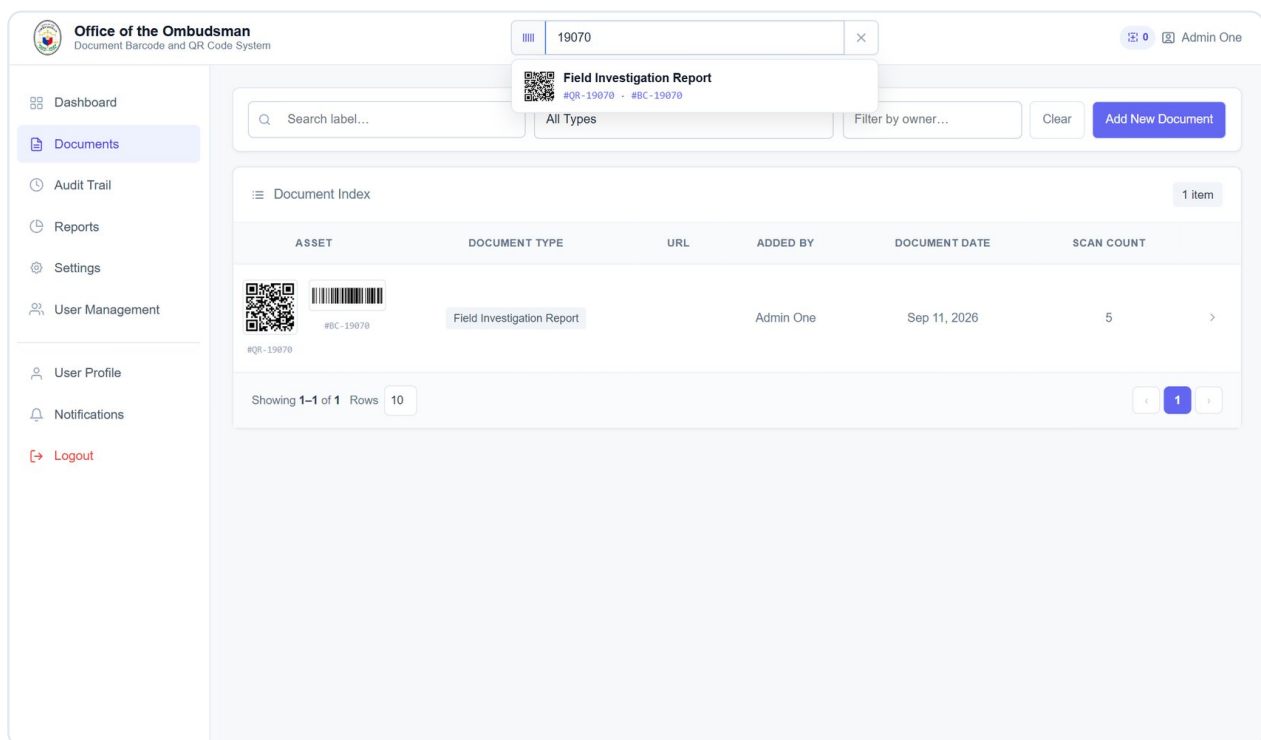

Figure 9. Matching documents drop down under the scan box as the code is entered.

A **Scan Result** window shows the document's code(s), its type and who added it, with a button to download the code image(s). The document's scan count and your scan counter both go up by one.

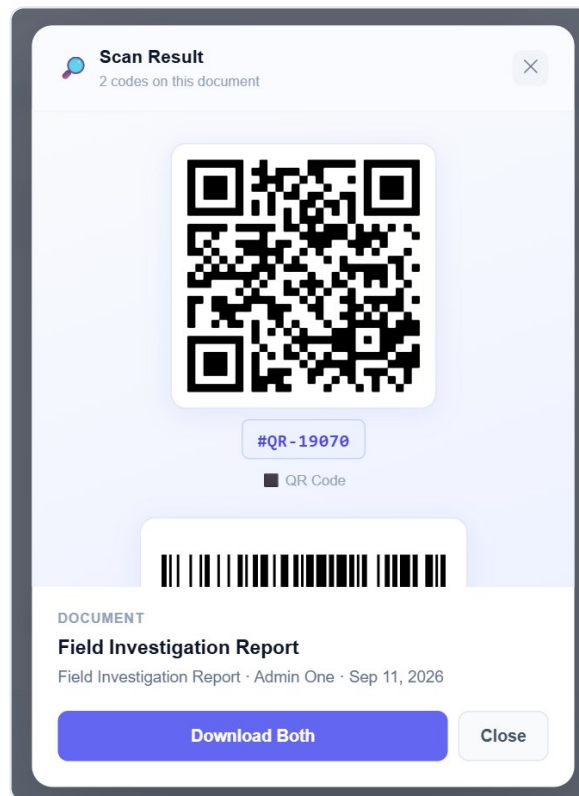

Figure 10. The Scan Result window.

By typing

Type at least two characters of a code or a label, for example `0042` or `travel`. Up to eight matching documents appear under the box; click one to open it. On the Documents page the list below also filters as you type.

If you press Enter and nothing in the list matches, a **No match** message appears. Check the code, and clear the filters in case they hide the document.

With a phone camera

Point the phone's camera at a **QR code** and open the link it offers. The phone shows the document's **Scanned Document** page:

- The code image, the document's label and its Code ID.
- Document Type, Department, Document Date, any Additional Information and Added By, the same details as the printed label.
- [Open Document](#), when a Link / Document URL is recorded.
- [Open Attached File](#), when a file is attached.
- [Open in the DMS](#) if the phone is already signed in to the system, or [Sign in to the DMS](#) if not.

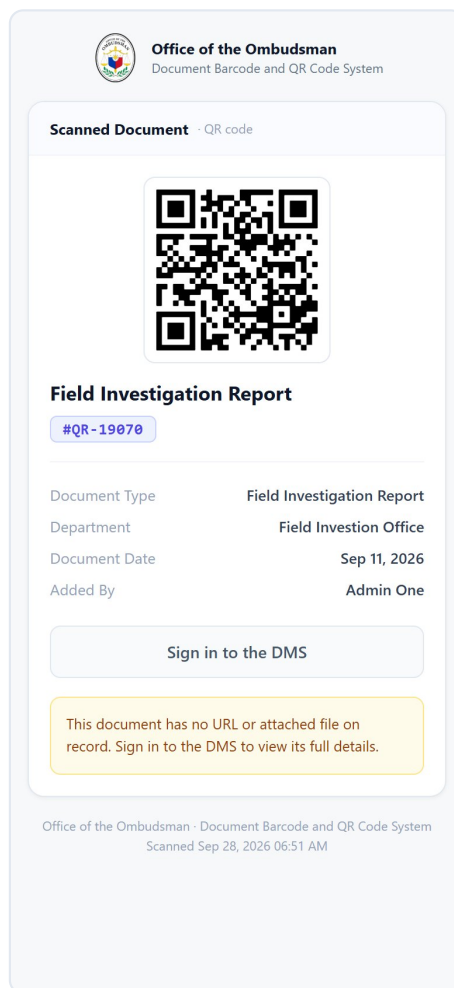

Figure 11. The Scanned Document page on a phone that is not signed in.

Important. The Scanned Document page can be opened **without signing in**, by anyone who scans the label. Anything on the label and in the document's fields is visible to whoever holds the paper. Do not put confidential details in the label or in custom fields.

Note. Barcodes contain only the tracking number, so a phone camera shows the number rather than a page. Use a handheld scanner with barcodes.

Scan counts

Every scan through the scan box and every visit to a QR code's page adds one to the document's **Scan Count** column. The indigo badge in the top bar counts the scans you have made in this browser.

CHAPTER 12

Notifications

The **Notifications** item in the menu shows a red badge with the number of unread notifications. The system notifies you each time a document you added is saved successfully.

Action	How
Read notifications	Click Notifications in the menu. Unread items are highlighted with a bell; read items show a tick.
Mark one as read	Click Mark read beside it.
Mark all as read	Click Mark all as read at the top of the page.

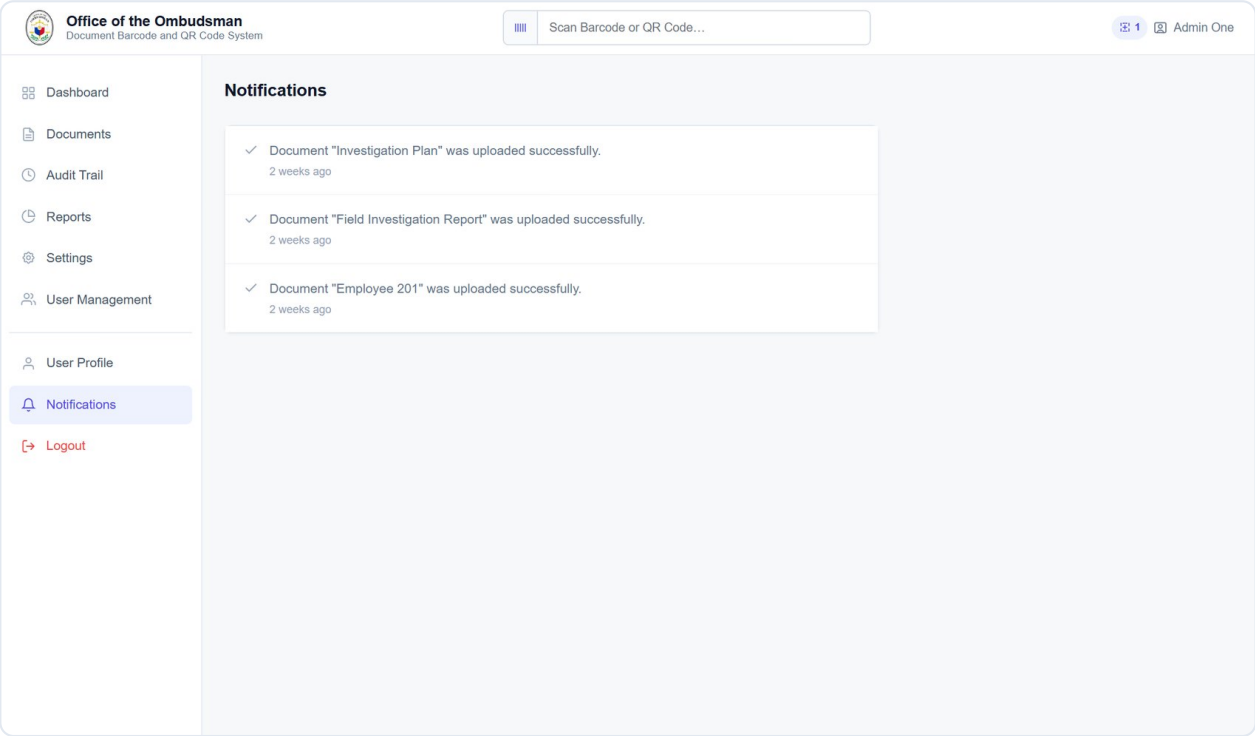

Figure 12. The Notifications page.

CHAPTER 13

Your User Profile

Open User Profile in the menu to manage your own account.

The screenshot displays the 'User Profile' page of the 'Office of the Ombudsman Document Barcode and QR Code System'. The interface includes a top header with the system name and a search bar, and a left sidebar with navigation links. The 'User Profile' section is active, showing fields for Name, Email, and Role, along with a 'Save Changes' button. Below this is a 'Change Password' section with fields for Current Password, New Password, and Confirm New Password.

Figure 13. The User Profile page.

Profile Information

Change your **Name** or **Email** and click **Save Changes**. Your **Role** is shown for information; only an administrator can change it.

Change Password

- 1 Enter your **Current Password**.
- 2 Enter the **New Password** and repeat it in **Confirm New Password**. Use at least 8 characters.
- 3 Click **Update Password**.

Delete Account

Click **Delete Account**, enter your password and click **Confirm Delete**.

Warning. Deleting your account is permanent. **Every document you added is deleted with it.** If you are leaving the office, ask an administrator to reassign your work rather than deleting your account.

PART III

Administration

Chapters for users with the admin role: monitoring, users and roles, configuration, reporting and auditing.

CHAPTER 14 ADMIN ONLY

Dashboard

An overview of documents and activity for a chosen period.

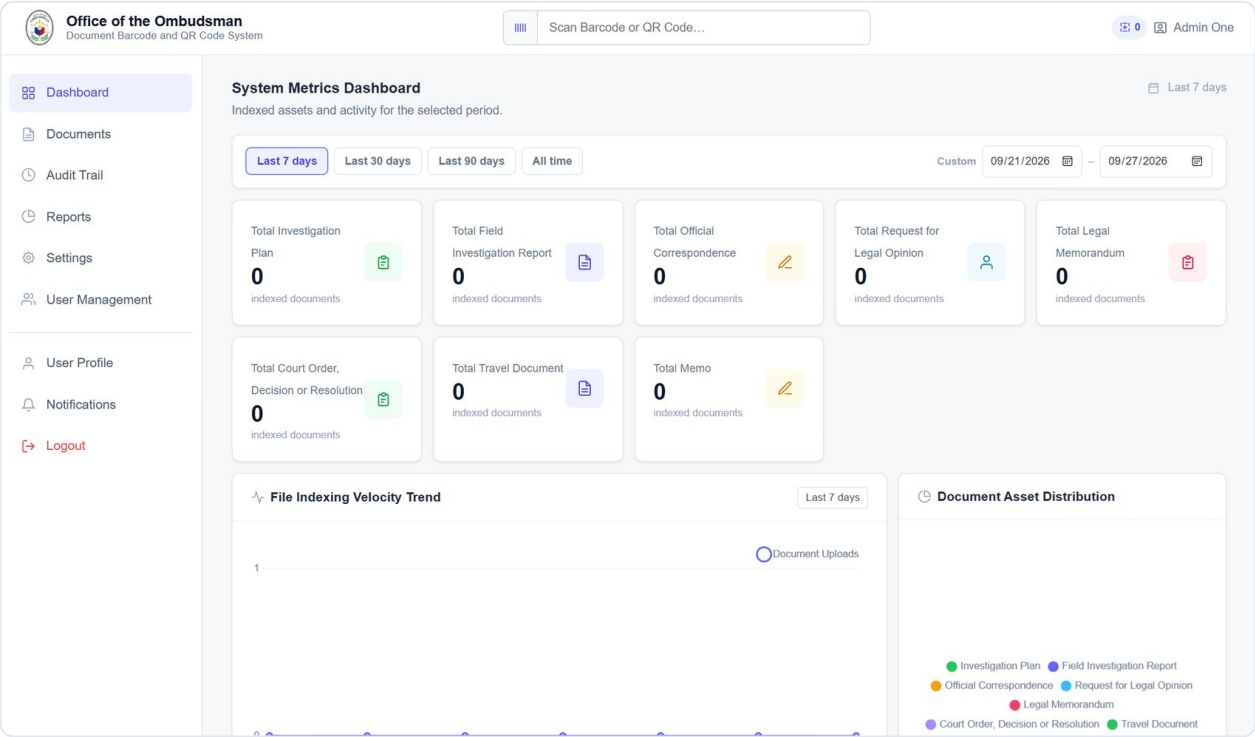

Figure 14. The Dashboard.

Choosing the period

Use the buttons under the heading: **Last 7 days** (the default), **Last 30 days**, **Last 90 days** or **All time**. For a custom period, pick both dates under **Custom**; the page updates when both are set. **Clear** returns to the last 7 days. The chosen period is shown at the top right and is kept in the page address, so you can bookmark or share it.

What the dashboard shows

Panel	Content
Metric cards	One card per document type with the number of documents indexed in the period.
File Indexing Velocity Trend	A line chart of documents added per day across the period.
Document Asset Distribution	A doughnut chart of the share of each document type.
Latest User Activity	The eight most recent audit events, such as sign-ins and records created or updated. View Audit Log opens the full trail.
Operational Quicklinks	Shortcuts to Add Document , Manage Types , Manage Users and System Reports .

CHAPTER 15 ADMIN ONLY

User Management

Create accounts, assign roles and manage the list of roles.

The user list

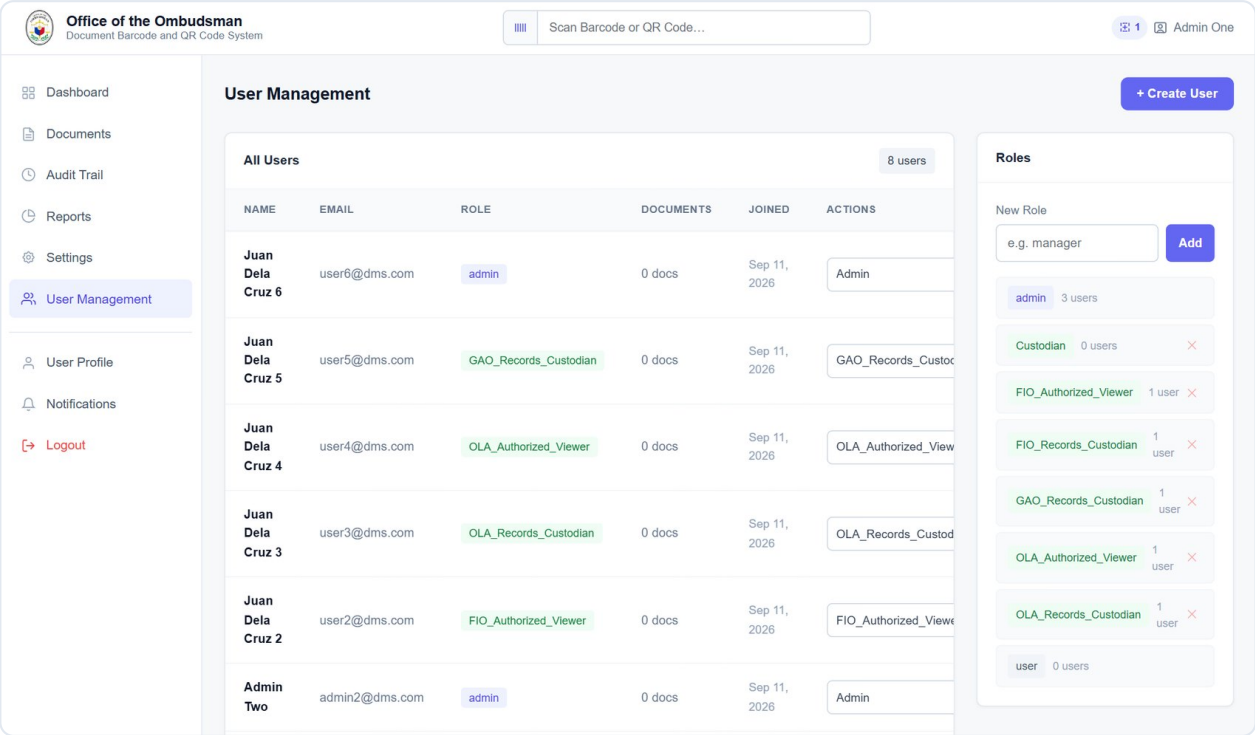

Figure 15. User Management: the user list on the left and the Roles panel on the right.

All Users lists each account with its Name, Email, Role, the number of Documents it has added, and the date it Joined. Your own row is tagged **You**.

Creating a user

- 1 Click **+ Create User**.
- 2 Enter the **Full Name** and **Email Address**. The email must not already be in use.
- 3 Choose the **Role**.
- 4 Enter a **Password** of at least 8 characters and repeat it in **Confirm Password**.
- 5 Click **Create User**. Give the user their email and password through a secure channel.

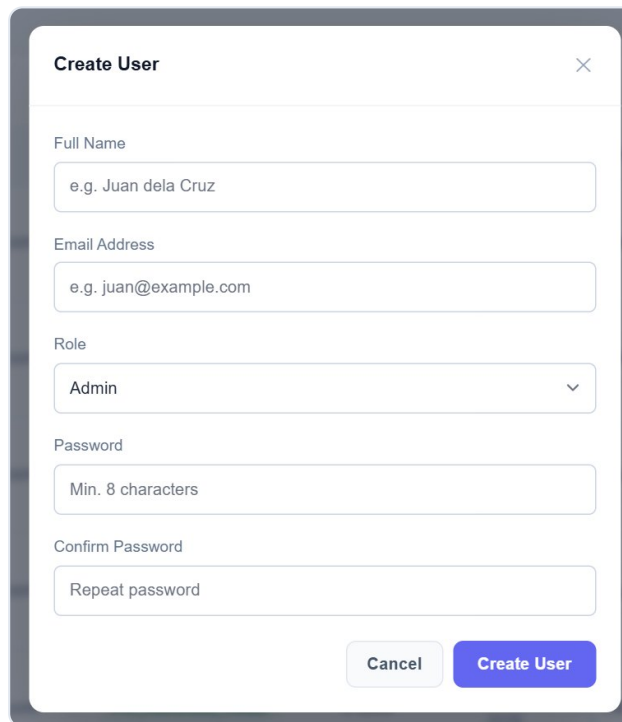

A modal form titled "Create User" with a close button (X) in the top right corner. The form contains five input fields: "Full Name" with a placeholder "e.g. Juan dela Cruz", "Email Address" with a placeholder "e.g. juan@example.com", "Role" with a dropdown menu showing "Admin" and a downward arrow, "Password" with a placeholder "Min. 8 characters", and "Confirm Password" with a placeholder "Repeat password". At the bottom right, there are two buttons: a light gray "Cancel" button and a blue "Create User" button.

Figure 16. The Create User form.

Changing a user's role

Pick the new role in the dropdown in the user's **Actions** column. The change is saved immediately. You cannot change your own role.

Editing a user

Click **Edit** to change the name, email or role. To reset a forgotten password, type a new one in **New Password** and **Confirm Password**; leave both blank to keep the current password. Click **Edit User** to save.

Deleting a user

Click **Delete** and confirm. You cannot delete your own account from this page.

Warning. Deleting a user also **permanently deletes every document that user added**, with their tracking codes. Before deleting, check the **Documents** count in the user's row. To stop someone signing in while keeping their documents, change their password instead.

Roles

The **Roles** panel lists each role and how many users hold it.

- **To add a role**, type a name under **New Role** and click **Add**. Use letters, numbers, dashes and underscores; spaces become underscores. Example: `records_officer`.
- **To delete a role**, click the delete button beside it and confirm. Users who had that role lose it. The core roles **admin** and **user** cannot be deleted.
- A new role has no access until you grant it folders (Chapter 16, *Folders*).

CHAPTER 16 ADMIN ONLY

Settings

System-wide configuration, organised in five tabs.

Open **Settings** in the menu. The tabs are **General Settings**, **Document Form**, **Document Types**, **Folders** and **Code Format**. The **Audit Logs** button at the top right opens the Audit Trail.

General Settings

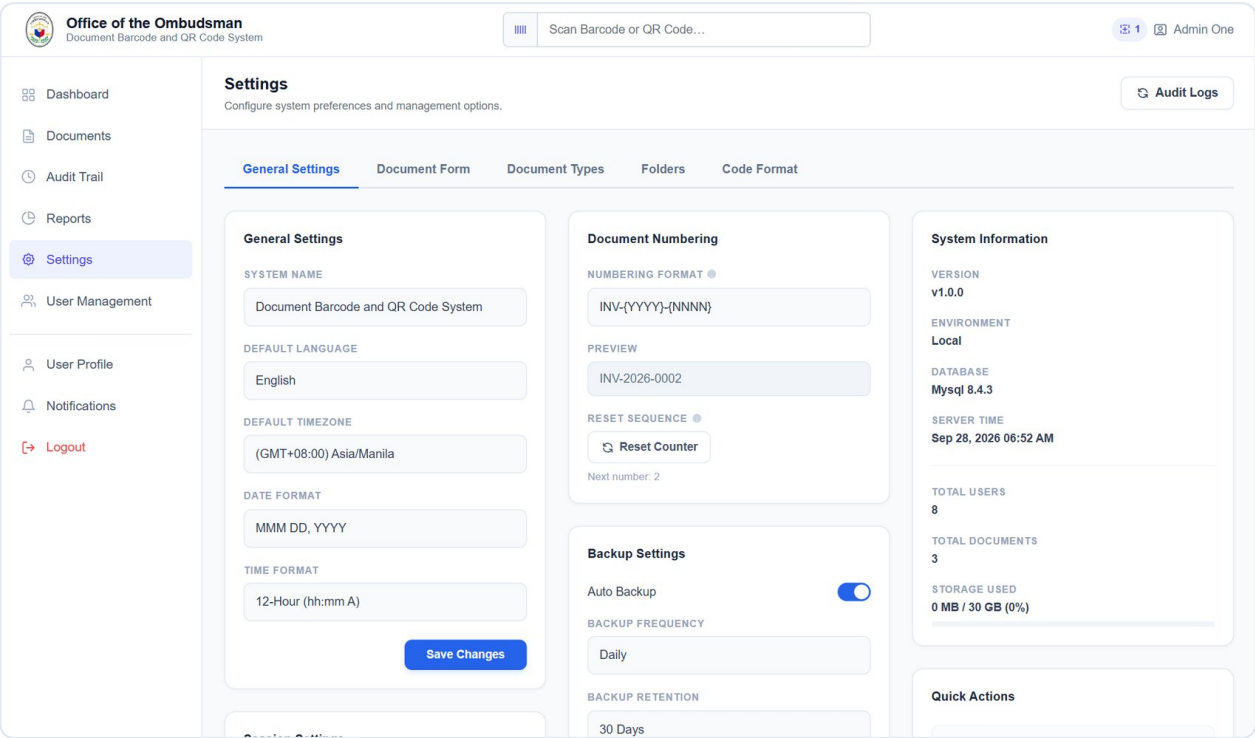

Figure 17. Settings, General Settings tab.

Important. The General Settings tab is one form. The **Save Changes** button in the **General Settings** card saves **every** card on the tab, including Session, Document Numbering and Backup settings. Changes take effect as soon as they are saved.

General Settings card

Setting	Effect	Default
System Name	The name shown under <i>Office of the Ombudsman</i> in the header, on the scan page and in the browser tab.	Office of the Ombudsman - Document Barcode and QR Code System
Default Language	The system's language preference (English, Filipino or Spanish). Screens are currently shown in English.	English
Default Timezone	The timezone in which every date and time is displayed, and in which tracking-number dates are taken.	Asia/Manila

Setting	Effect	Default
Date Format	How dates appear everywhere: MMM DD, YYYY · MM/DD/YYYY · DD/MM/YYYY · YYYY-MM-DD.	MMM DD, YYYY
Time Format	12-hour (hh:mm A) or 24-hour (HH:mm).	12-Hour

Session Settings card

Setting	Effect	Default
Session Timeout	Minutes without activity before a user is signed out: 15, 30, 60, 120 or 240.	30 minutes
Idle Logout Warning	How long before sign-out the <i>Still there?</i> countdown appears: 2, 5 or 10 minutes. If this is not shorter than the timeout, half the timeout is used.	5 minutes
Remember Me	Shows or hides the Remember me box on the Sign In page.	On

Document Numbering card

Numbering Format controls the tracking number of every new document. **Preview** shows the next number exactly as it will be issued.

Token	Replaced with	Example (28 Sep 2026)
{YYYY}	Four-digit year	2026
{YY}	Two-digit year	26
{MM}	Two-digit month	09
{DD}	Two-digit day	28
{NNNN}	The running counter, zero-padded to the number of N's	0042

- Example: `OMB-{YY}{MM}-{NNNN}` produces `OMB-2609-00042`.
- If the format has no counter token, `-{NNNN}` is added to the end automatically.
- If the format is left blank, documents receive a random five-digit number instead.
- **Reset Counter** starts the counter again at 1, for example at the start of a new year. Numbers already issued are kept, and any number that is already in use is skipped automatically. **Next number** shows the counter value the next document will take.
- Changing the format affects new documents only. Existing codes never change.

Backup Settings card

Setting	Effect
Auto Backup	Turns scheduled backups on or off.
Backup Frequency	Daily, Weekly (Mondays) or Monthly (the 1st). Backups run at 01:00 in the system timezone.
Backup Retention	Backups older than this (7, 14, 30 or 90 days) are removed automatically.

Setting	Effect
Backup Now	Creates a backup immediately and downloads it to your computer as a ZIP file. The line below shows when the last backup was made.

A backup contains a copy of the database (`database.sql`) and every stored file, including the code images. A copy of each backup is also kept on the server.

Note. Scheduled backups rely on the server's task scheduler. Ask your IT staff to confirm it is running. Keep downloaded backups somewhere safe, as they contain every record in the system.

System Information card

Read-only facts about the installation: Version, Environment, Database, Server Time, Total Users, Total Documents, and Storage Used with a usage bar.

Quick Actions card

Action	Result
Manage Document Types	Switches to the Document Types tab.
Manage Roles & Permissions	Opens User Management.
View Audit Logs	Opens the Audit Trail.
Manage Workflow Templates, Configure Email Settings	Reserved for future use; they do nothing yet.
Reset System Settings	After confirmation, returns every General Settings value to its default, including the numbering counter. The document form, document types and folders are not affected.

Document Form

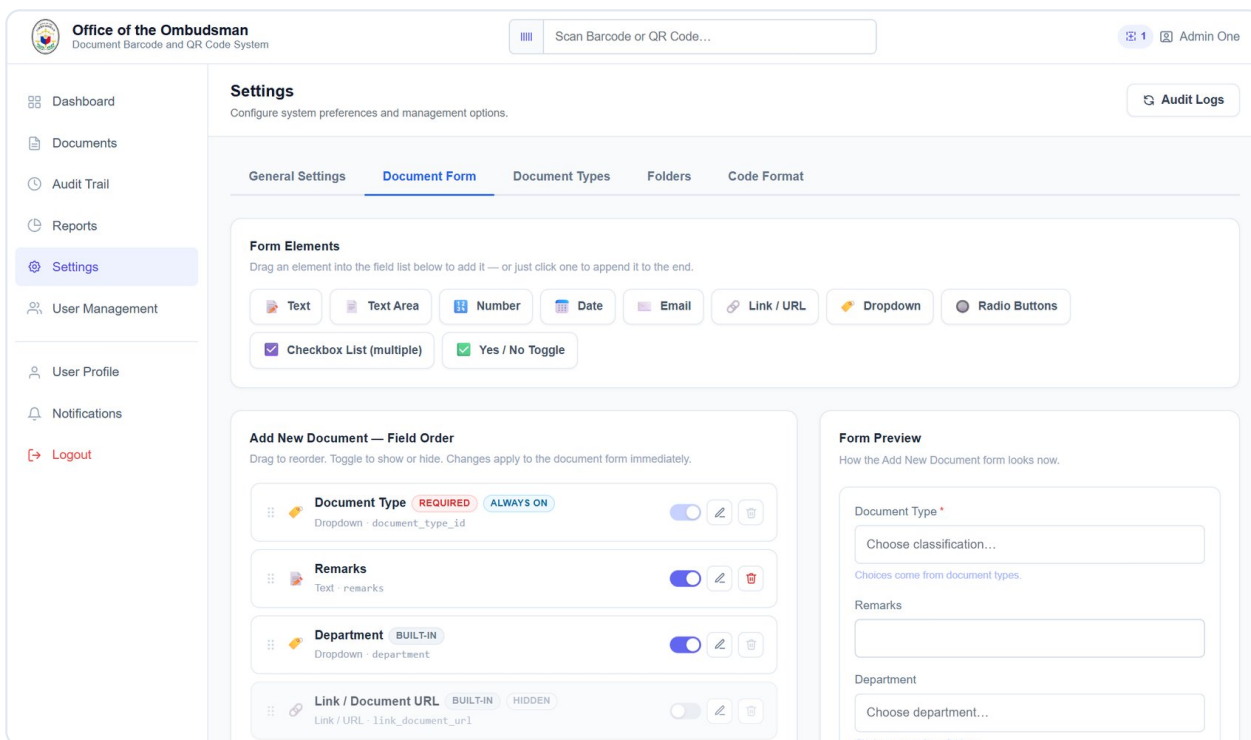

Figure 18. Settings, Document Form tab: the element palette, the field list and the live preview.

This tab defines the fields on the **Add New Document** and **Edit Document** forms. It has three areas: **Form Elements** (the palette), **Add New Document — Field Order** (the field list), and **Form Preview** (how the form looks now). Every change applies to the form immediately.

Adding a field

- 1 In **Form Elements**, click an element type to add it at the end of the list, or drag it into the list at the position you want.
- 2 In the editor that opens, enter the **Field Label** and, optionally, a **Placeholder** (the grey hint inside the box) and **Helper Text** (the note under the field).
- 3 For Dropdown, Radio Buttons and Checkbox List fields, type each option under **Choices**; use **+ Add choice** for more.
- 4 Set **Required** and **Show on form** as needed.
- 5 Click **Add Field**.

Managing fields

Task	How
Reorder	Drag a row by its handle to a new position.
Show or hide	Use the switch on the row. Hidden fields keep their saved values but do not appear on the form or in details.
Edit	Click the pencil button, change the settings, then Save Changes .
Delete	Click the bin button and confirm. Existing documents keep their saved value, but the field is no longer shown.

Field tags

Tag	Meaning
Required	The form cannot be saved without a value.
Always on	The system needs this field. It cannot be hidden or made optional.
Built-in	A standard field. It can be renamed, reordered or hidden, but not deleted, and its type cannot change. The choices for Document Type, Department, Assign to Specific Users and Assign to System Roles come from the live lists automatically.
Hidden	The field is switched off.
System · Locked	The Tracking Code block. It is always last and cannot be moved, hidden or removed.

The element types available are listed in Appendix B.

Configure system preferences and management options.

Audit Logs

General Settings Document Form **Document Types** Folders Code Format

Add Document Type

Type Name Folder (optional)

e.g. Memorandum No folder Add Type

8 Types

NAME	FOLDER	DOCUMENTS	ACTIONS
Court Order, Decision or Resolution	Office of Legal Affairs	0 docs	Edit Delete
Field Investigation Report	Field Investigation Office	1 docs	Edit Delete
Investigation Plan	Field Investigation Office	2 docs	Edit Delete
Legal Memorandum	Office of Legal Affairs	0 docs	Edit Delete
Memo	General Administration Office	0 docs	Edit Delete

Figure 19. Settings, Document Types tab.

Adding a type

- 1 Enter the **Type Name**, e.g. *Memorandum*. Names must be unique.
- 2 Choose its **Folder**.
- 3 Click **Add Type**.

Important. A type with **No folder** is visible only to administrators, and no other role can add documents of it. Always put a type in a folder.

Editing and deleting types

The list shows each type's Name, Folder and number of Documents. Click **Edit** to rename the type or move it to another folder, then **Save**. Moving a type moves all its documents' access with it.

Warning. Deleting a document type **permanently deletes every document of that type**. Check the Documents count first; there is no undo.

Folders

Folders are both the **departments** offered on the document form and the way access is granted to roles.

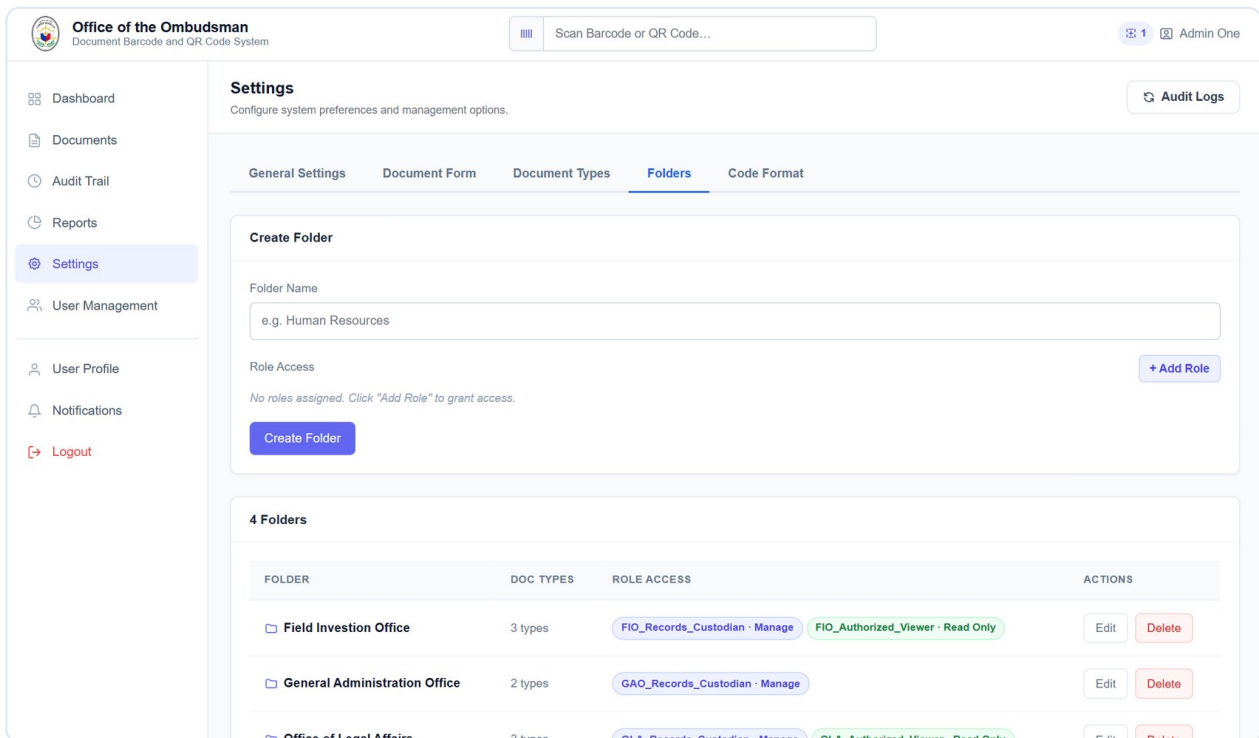

Figure 20. Settings, Folders tab. Each folder lists the roles that can use it.

Creating a folder

- 1 Enter the **Folder Name**, e.g. *Human Resources*.
- 2 Under **Role Access**, click **+ Add Role**, choose a role and set it to **Manage** or **Read Only**. Repeat for each role that needs access; **X** removes a row.
- 3 Click **Create Folder**.
- 4 Go to **Document Types** and assign the relevant types to the new folder.

Editing and deleting folders

The list shows each folder, its number of document types, and each role's access (e.g. *records_officer · Manage*). Click **Edit** to rename the folder or change its role access, then **Save Changes**. Access changes apply straight away.

Figure 21. Editing a folder's role access.

Important. Deleting a folder does not delete documents. Its document types are left without a folder (so only administrators see them) and its documents lose their department. Move the types to another folder first.

Example folder	Role access	Result
Records Section	records_officer · Manage viewer · Read Only	Records officers add, edit and delete; viewers can only look up and print.
Legal Affairs	legal · Manage	Only the legal role (and administrators) see Legal Affairs documents.

Code Format

A design sandbox for QR codes and barcodes. Choose the **QR Code** or **Barcode** tab, enter sample data and label text, choose the layout, colours and size, and the **Live Preview** updates immediately.

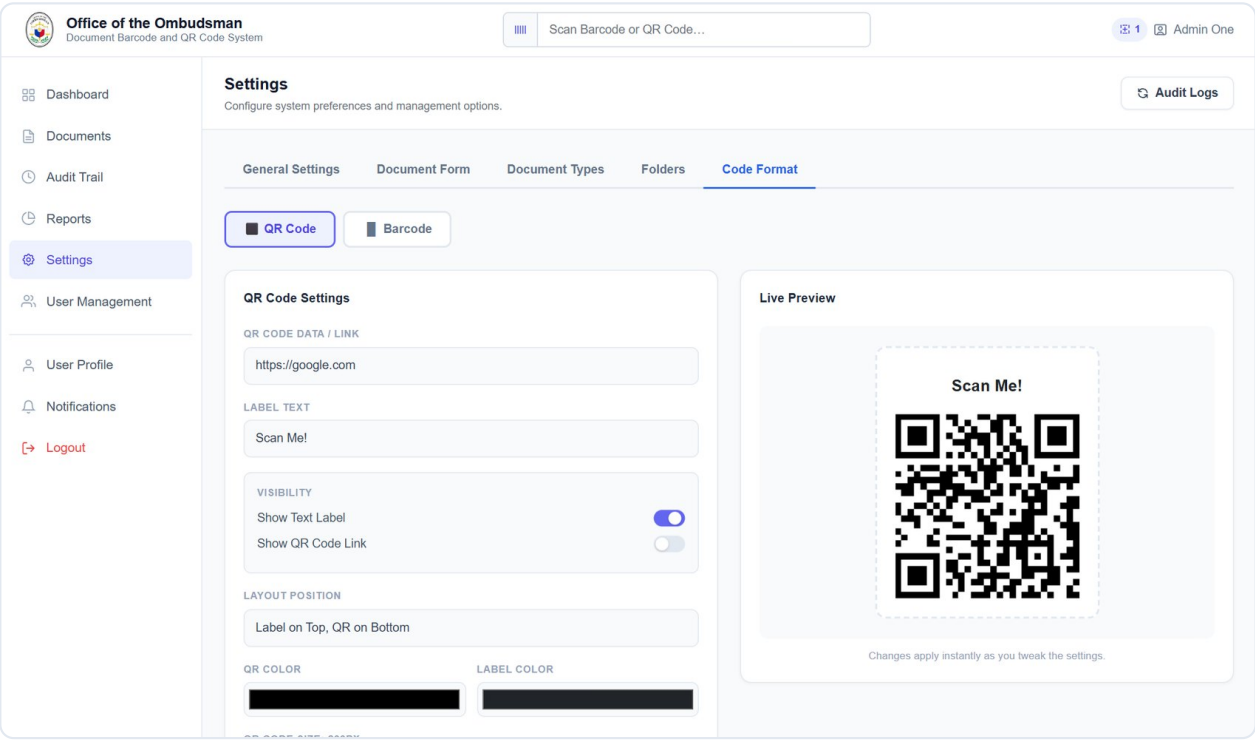

Figure 22. Settings, Code Format tab.

Note. Code Format is a preview tool only. Its settings are not saved and do not change the codes the system issues or prints.

CHAPTER 17 ADMIN ONLY

Reports

Filtered, printable reports of document inventory and user activity.

Open **Reports** and choose a tab. Set filters and click **Filter**; **Clear** removes them. Results show 20 rows per page.

Document List per Type

Filter	Effect
Document Type	One type, or All Types.
Label	Label contains the text.
Department	Department name contains the text.
Date From / Date To	Documents added within the dates.

Columns: Asset (codes), Label, Document Type, Department, Added By, Document Date.

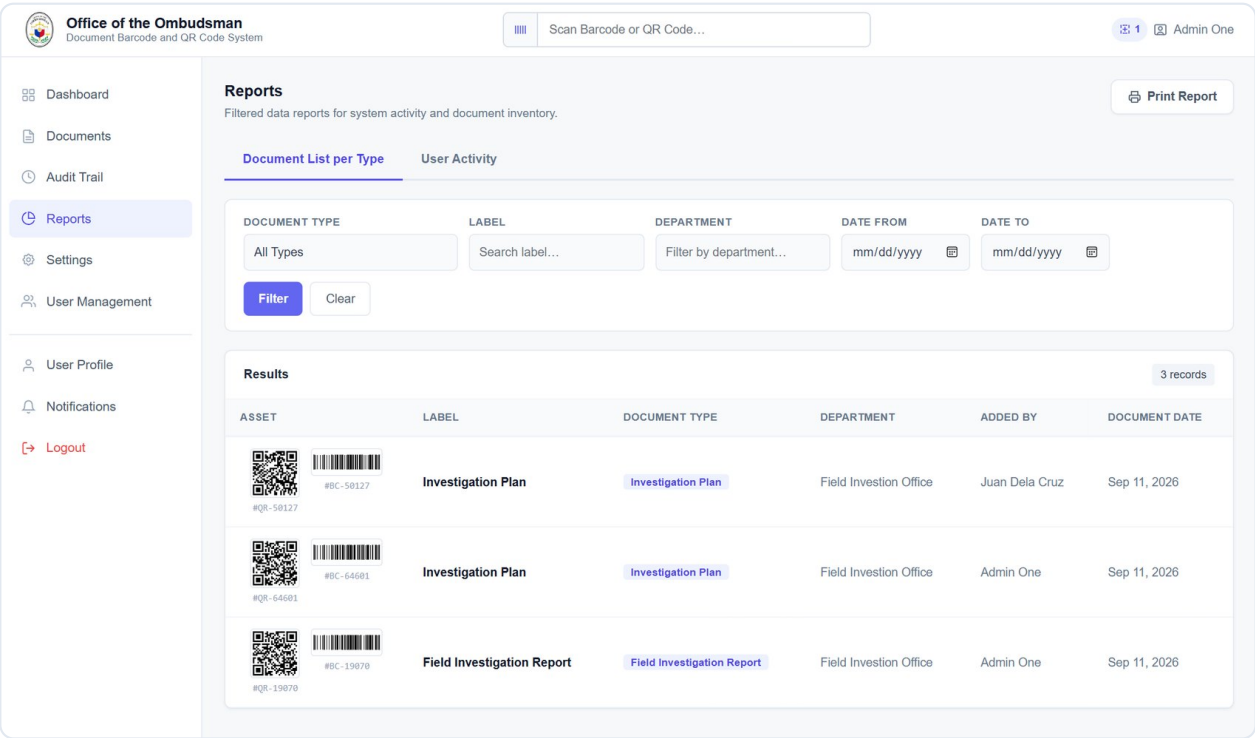

Figure 23. Reports, Document List per Type.

User Activity

Filter	Effect
User	One user, or All Users.
From / To	Activity within the dates.

Columns: User, Date & Time, Activity (such as *Logged In*, *Uploaded Document*, *Updated Document*, *Deleted Document*, *Created Document Type*), Document Name and Document Type.

Figure 24. Reports, User Activity.

Printing a report

Click **Print Report** at the top right. A printable version of the current tab opens in a new window; use your browser's print command to print it or save it as PDF.

Note. The printed Document List applies the Document Type and date filters. The Label and Department filters narrow the on-screen list only.

CHAPTER 18 ADMIN ONLY

Audit Trail

A complete log of sign-ins and of every record created, updated or deleted.

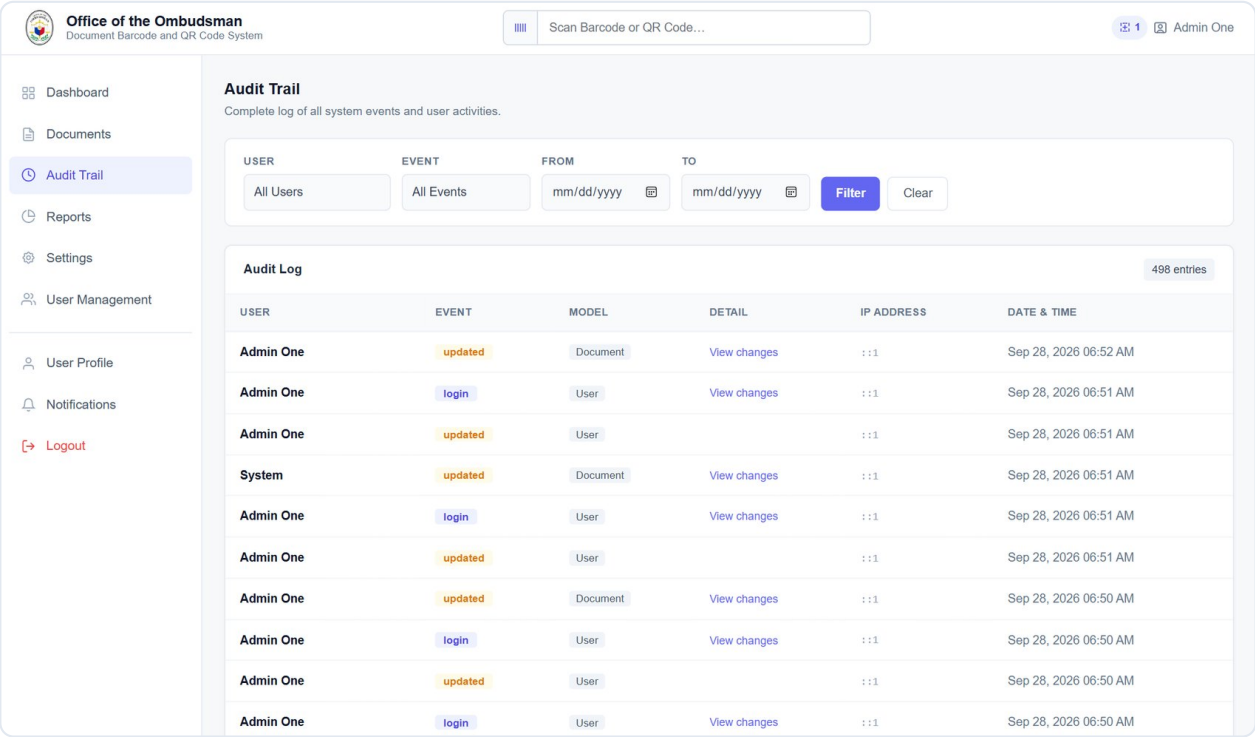

Figure 25. The Audit Trail.

Filtering

Filter	Options
User	One user, or All Users.
Event	Login, Created, Updated or Deleted.
From / To	Date range.

Click **Filter** to apply and **Clear** to reset. The log shows 20 entries per page, newest first.

Reading an entry

Column	Content
User	Who performed the action.
Event	login, created, updated or deleted (colour-coded).
Model	What was affected: Document, User, Document Type, form field, and so on.
Detail	Click View changes to see the values Before and After the change.
IP Address	The network address the action came from.

Column	Content
Date & Time	When it happened.

Note. Passwords and other sensitive values are never written to the audit trail.

PART IV

Reference

Setup checklist, troubleshooting, glossary and quick-reference tables.

CHAPTER 19 ADMIN ONLY

First-Time Setup Checklist

The recommended order for configuring a new installation.

- 1 **Sign in as the administrator.** The first account created on the system holds the admin role.
- 2 **Settings > General Settings.** Check the System Name, Timezone, Date Format and Time Format; set the Session and Backup options; click **Save Changes**.
- 3 **Document Numbering.** Decide the tracking-number format (e.g. `OMB-{YYYY}-{NNNN}`) before any documents are added, and save.
- 4 **User Management > Roles.** Create a role for each kind of staff, e.g. `records_officer` and `viewer` .
- 5 **Settings > Folders.** Create one folder per department and grant each role Manage or Read Only.
- 6 **Settings > Document Types.** Create the document types and put each one in its folder.
- 7 **Settings > Document Form.** Review the standard fields; rename, hide or add fields to match what your office records.
- 8 **User Management.** Create the staff accounts and assign their roles.
- 9 **Test.** Sign in as a non-admin user, add a document, print its label, and scan it with your scanner and a phone.
- 10 **Backups.** Click **Backup Now** once to confirm backups work, and ask IT to confirm the scheduler is running.

CHAPTER 20

Troubleshooting and FAQ

I don't see the Add New Document button.

Your role has no Manage grant on any folder. Ask an administrator to grant it on the folder you work in.

A colleague can see a document but I can't.

The document's type is in a folder your role has not been granted, or the type has no folder. Ask an administrator.

There is no Edit or Delete button on a document.

Your role has Read Only access to that document's folder.

The scanner does nothing.

Click inside the scan box first so it has focus. Check the scanner is set to send Enter after each scan.

I get "No match" after scanning.

Click Clear to remove filters on the Documents page. If it still fails, the document may be in a folder you cannot see, or it may have been deleted.

A phone opens a page asking me to sign in.

That is the public Scanned Document page. Tap Sign in to the DMS to open the full record.

The print window does not open.

Allow pop-up windows for the system's address in your browser settings.

The printed code will not scan.

Print at 100% scale, avoid faded or low-contrast printing, and keep labels flat and clean.

I was signed out while working.

You were inactive for longer than the session timeout. Answer the Still there? prompt to stay signed in.

"This document type belongs to a different department."

Choose the Document Type first; the Department is filled in to match.

My new account shows no documents.

New accounts start with the user role and no folder access. Ask an administrator to assign your role.

I forgot my password and no reset email arrives.

Ask an administrator to set a new password through User Management > Edit.

My General Settings changes did not stick.

Click Save Changes in the General Settings card; it saves every card on the tab.

Can I change a document's tracking code?

No. Codes are fixed so printed labels remain valid. If a code is truly wrong, delete the document and add it again.

CHAPTER 21

Glossary

Term	Definition
Administrator (admin)	A user with the admin role, with full access to every page and document.
Asset	The column in lists that shows a document's code images.
Audit trail	The log of sign-ins and changes to records.
Barcode	A one-dimensional Code 128 barcode containing a document's tracking number.
Built-in field	A standard document-form field that can be hidden or renamed but not deleted.
Code ID	The reference printed under a code, e.g. #QR-INV-2026-0001.
Department	The folder a document belongs to, through its document type.
Document Type	A category of document, placed in one folder.
Folder	A group of document types through which roles are granted access.
Label	The name of a document, printed at the top of its labels.
Manage	Folder access that allows adding, editing and deleting documents.
Numbering format	The pattern for tracking numbers, set in Settings.
QR code	A square two-dimensional code containing the address of a document's Scanned Document page.
Read Only	Folder access that allows viewing, searching and printing only.
Role	A named group of users used to grant access.
Scan count	How many times a document has been opened by scanning.
Scanned Document page	The public page a phone opens when it scans a QR code.
Tracking code	A document's QR code and/or barcode.

CHAPTER 22

Quick Reference

Appendix A — Keyboard and mouse

Key or action	Result
Enter (in the scan box)	Opens the first matching document.
Esc	Closes the open window, such as document details or the add form. Also hides the scan suggestions.
Click outside a window	Closes it.
Drag (Document Form)	Adds an element to the field list, or moves a field.

Appendix B — Document form element types

Element	Use for	Stored as
Text	Short text such as a reference number (up to 255 characters).	Text
Text Area	Longer notes (up to 2,000 characters).	Text
Number	Numeric values such as page counts.	Number
Date	Calendar dates; shown in the system date format.	Date
Email	An email address; checked for a valid format.	Text
Link / URL	A web address; shown as a clickable link.	Text
Dropdown	One choice from a list.	One choice
Radio Buttons	One choice, with every option visible.	One choice
Checkbox List (multiple)	Any number of choices from a list.	List of choices
Yes / No Toggle	A single yes/no flag such as <i>Confidential</i> . Its text is set in Checkbox Text .	Yes or No

Appendix C — Default settings

Setting	Default value
System Name	Office of the Ombudsman - Document Barcode and QR Code System
Language / Timezone	English / Asia/Manila
Date / Time format	MMM DD, YYYY / 12-Hour (hh:mm A)
Session timeout / Idle warning	30 minutes / 5 minutes before logout
Remember Me	On

Setting	Default value
Numbering format	INV-{YYYY}-{NNNN}
Auto backup	On, Daily, kept 30 days

Appendix D — Where to find things

I want to...	Go to
Add a document	Documents › Add New Document
Print a label	Documents › › (view) › Print QR / Print Barcode
Find a document by its label	Scan box, or Documents › Search label...
Change my password	User Profile › Change Password
Give a role access to a department	Settings › Folders › Edit
Add a field to the form	Settings › Document Form
Change the tracking-number format	Settings › General Settings › Document Numbering
See who changed a record	Audit Trail › View changes
Print a document inventory	Reports › Document List per Type › Print Report
Back up the system	Settings › General Settings › Backup Now

End of manual.
